

Industry Certifications

ZSi-Foster's products are designed and built to perform to the highest standards. With many of our products made in the United States, we adhere to the most rigorous of industry certifications and standards. Some but not all of our products and facility Our compliances include ISO 9001, RoHS, CMRT, and TSCA. Many products are also UL-listed, LEEDs certified, MFMA compliant, and exceed ASTM requirements. Contact your local ZSi-Foster representative for more details.

ASTM International ASTM International, formerly known as American Society for Testing and Materials, is an international standards organization that develops and publishes voluntary consensus technical standards for a wide range of materials, products, systems, and services.

Buy American Act Compliant The Buy American Act of 1933 attempts to protect U.S. businesses and labor by restricting the acquisition and use of end products or construction materials that are not "domestic."

Conflict Minerals Reporting We adhere to the Responsible Minerals Initiative (RMI) that facilitates the transfer of information through the supply chain regarding mineral country of origin and the smelters and refiners.

EPA: The Recovery Act Seeks in part to spur technological advances in science and health and to invest in environmental protection and other infrastructure that will provide long-term economic benefits. EPA's Region 3 office has aided America's economic recovery by allocating over six hundred thousand dollars of stimulus money for tank removal, drilling, soil sampling and the creation of more jobs.

ISO 14001 ISO 14001 is the international standard that specifies requirements for an effective environmental management system (EMS). It provides a framework that an organization can follow, rather than establishing environmental performance requirements.

ISO/TS IATF 16949 ISO/TS 16949 is an ISO technical specification aimed at the development of a quality management system that provides for continual improvement, emphasizing defect prevention and the reduction of variation and waste in the automotive industry supply chain and production.

Industry Certifications

Leadership in Energy and Environmental Design The most widely used green building rating system in the world. Available for virtually all building, community and home project types, LEED provides a framework to create healthy, highly efficient and cost-saving green buildings. LEED certification is a globally recognized symbol of sustainability achievement.

Made in America: American Recovery and Reinvestment Act (ARRA) An Act making supplemental appropriations for job preservation and creation, infrastructure investment, energy efficiency and science, assistance to the unemployed, State, and local fiscal stabilization, for the fiscal year ending September 30, 2009, and for other purposes.

Prop 65 Compliance We are compliant with Proposition 65 requiring warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm.

RoHS Products manufactured by Foster Manufacturing are in compliance with the following directives:

- Directive 2011/65/EU of the European Parliament and of the Council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment (also known as "RoHS Recast").
- Commission Delegated Directive (EU) 2015/863 of 31 March 2015 amending Annex II to Directive 2011/65/EU of the European Parliament and of the Council as regards the list of restricted substances.

TSCA Certificate of Compliance The Toxic Substances Control Act of 1976 (TSCA) is a federal regulation that allows the U.S. Environmental Protection Agency (EPA) to comprehensively manage chemicals in U.S. commerce.

UL UL LLC is a global safety certification company. It maintains offices in 46 countries. Established in 1894 as the Underwriters' Electrical Bureau (a bureau of the National Board of Fire Underwriters), it was known throughout the 20th century as Underwriters Laboratories and participated in the safety analysis of many of that century's new technologies.
